

BYOD

BYOD Grade Levels for 2018-2019:

Technology continues to provide valuable resources for every student's educational toolkit and opportunities for enriching classroom learning. As a reminder, this fall the BYOD program will expand to additional grade levels:

Middle School: Grades 6 & 7 will be BYOD for 2018-2019

High School: Grades 9-11 will be BYOD for 2018-2019

To participate in the BYOD program, a student simply brings their personal device to school each day. For questions about device selection and minimum suggested requirements, visit our BYOD resource page at www.losal.org/BYOD. The resource page also includes:

- [Links to device galleries](#) if you need to find and purchase a BYOD device
- [Links to resources for guiding parents in supporting student safety and privacy online](#)
- Guides for setting up a Chromebook to support the Securely web safety tool (*Launching in August 2018*)

We understand that not every family can send their student to school with a device, so each school provides devices to students who don't have their own. These devices are left in the classroom and are for classroom community use during.
